News of Ministers

Some pastoral changes approved by the United Church Settlement Committee affect us locally.

Rev. N. W. Whitmore will take over duties at Wainwright commencing July 1st.

Work at Empress will be assumed by Rev. Geo. A. Shields, who comes out to Alberta from London Conference.

Rev. F. A. Bowen, continues his pastorate at Islay (near Vermilion) and Rev. V. M. Gilbert moves from Olds to Rockyford.

Rev. Chas. Pinder who spent a summer on the rural section south of Blackfoot, continues his work at Pleasant Heights, Calgary.

Leland

Public worship at 3 o'clock Sunday afternoon

We shall commemorate the 3rd anniversary of the foundation of the United Church of Canada.

N. W. Whitmore, Minister.

Statistical Note

If all the people who were staying in boarding houses for the recent holidays were placed end to end they would reach out for a second helping

Screen's Smallest Actor

The screen's smallest actor donned grease paint for an important role in Douglas MacLean's unusual comedy "Soft Cushions" which will be at the Empress Theatre Friday and Saturday. It's a Paramount Picture.

The Mayfield ball team were visitors in Empress, Saturday, to play the locals. The result was an 8.5 win for the home-sters. Both teams showed lack of practice.

"What Happened To Jones" Large Audience Enjoys Very Pleasing Presentation

There was a very good attendance at the theatre, on Wednesday evening to witness the production by the Empress Players of the rollicking farce, "What Happened To Jones," and the audience rocked with laughter. It was attentively presented. The character impersonations were excellent and the play went over with a bang.

The scene took place in the well furnished living room of Ebenezer Goodly, a professor of anatomy.

Obviously the professor was in a difficult time to locate a place of quiet in order to prepare his lessons as his brother, the Bishop of Ballarat was coming to visit him, and the two had not met for thirty years.

Naturally Ebenezer's wife was desirous of impressing the Bishop with her great ability in domestic management, but in so doing irritates the Professor, Marjorie, one of the Professor's charming daughters is engaged to Richard Heatherly, an apparently loathless young man. Richard persuades the Professor to attend a prize fight. The police raid the place. The Professor and Richard, battered and torn make a marvelous escape, but are followed by the infuriated police.

Empress Team Take First Money At Burstall Sports

The Empress ball team "did things" when they hit out for Burstall on Monday, to contest for the ball money offered by that town at their celebration. The Empress team, however, with some good old reliable

packed away on the team, it was the unexpected that it happened at Burstall.

Tommy contesting were: Horsham, Empress, Captain, Leader, Fox Valley and Burstall.

In the first frame, Horsham and Empress were bracketed together. Brennan and McCune were the avenger for Empress with the reliable Eldie, receiving. The game was featured by a long and

snappy. Empress claimed the game 4-3. Horsham's score-keeper claimed a tally of 4 runs. After considerable argument, it was finally agreed to play an extra innings.

Wainwright was added to the Empress score, and they took the game.

In the second frame, Empress were bracketed with Leader, who had trounced them badly on the previous Friday.

Wainwright was added to the Empress score, and they took the game.

Leland Win From Mayfield

A baseball game between Leland and Mayfield on Wednesday, provided some exciting moments. It is some time since we have seen a Leland team in the field, and some of the old-timers appeared for them. Both teams were keen to win. Apparently believing the game well-timed away in the early stages Mayfield showed the greatest tendency to win a well-run game by a score of 10-8. A large attendance of spectators were present. Weather conditions were not of the best for good ball.

Heavy Thunder Shower Is Accompanied By Hail

The town was visited by a very heavy thunder shower accompanied by hail, on Monday.

The storm was very narrow in extent, and covered but a small area out of town. The precipitation was very heavy while it lasted and totaled .80 of an inch.

Alberta Fire Losses In 1927

Thirty three deaths and property losses totalling \$2,338,777.92 resulted from fires in Alberta during the year 1927, according to the recently issued report of Henry Brace, provincial fire commissioner. Fire waste from the burning of dwellings, stores, barns and garages amounted to over \$1,500,000, or 65 per cent of the total fire losses for the year, and it is pointed out in the report that practically all of these fires were due to carelessness in some form or other. During 1927 a total of 736 cities, towns and villages in the Province were visited and inspected by officials of the fire commissioner's office and 637 orders were issued for the correction of defects. Convictions under the Fire Prevention Act during the year totalled 38 or 94.7 per cent of those brought to trial.

Dairy Pool Buys Edmonton Creamery Plant

As the result of negotiations which have been under way for some time, the Alberta Dairy Pool has bought out the interests and plant of the Edmonton Pure Butter Company, located at 9722 102nd Street, Edmonton. In addition to the plant, the Pool has taken over the services of the staff including C. B. Christensen, who will continue to act as manager for the Pool.

A Better Car than Ever at its Price

THE New Series Pontiac Six was designed and built in the belief that everybody admires style in a motor car.

So, in Pontiac Six, everybody can enjoy it!

Beautifully-proportioned bodies that tell their fabric craftsmanship at a glance.

Long, low lines and deep, massive radiator design.

Rich harmonies of color in exterior Duco and interior trim.

Delightful evidence of luxury in upholstery and appointments.

PLUS the smoothness of Pontiac's powerful "Six" engine.

The safety of Four Wheel Brakes and the comfort of Lovejoy Hydraulic Shock Absorbers.

No wonder the New Series Pontiac Six literally leads the field in style and refinement. Prove it all for yourself by a demonstration.

For Humanity!

The world scroll upon which is inscribed the names of men and women who have rendered distinguished service to the cause of humanity contains no name more worthy of such recognition than that of Henri Dunant, the centenary of whose birth in Geneva, Switzerland, was observed throughout the world on May 8th of this year, and who lived to the ripe old age of 82 years.

What service did Henri Dunant render to mankind entitling him to this honor?

As a young man of 31 years, Dunant, author and philosopher, was traveling for pleasure in the summer of 1859 in Northern Italy, and happened to arrive in the neighborhood of Solferino just at the conclusion of the battle which is known by that name, and which was waged between the Austrians under Francis Joseph II, and the Allied French and Sardinians. The opposing forces were of about equal strength, the total of men engaged being somewhere over 300,000. The armies met in the early morning and fought a sanguinary conflict until about two o'clock in the afternoon, when the Austrians were forced to retire. For about a little less than the losses were large, totaling 10,000 killed, wounded, and missing about 40,000.

Upon such a scene of carnage came Henri Dunant accidentally in the course of his journey for pleasure. Suffering and dying soldiers lay on the field filled the air with their cries and groans, but there was no organized care for them. His deepest sympathies stirred for these fellow-men, who but a few hours before were in the pride of health and strength. Henri Dunant organized the neighboring villagers who did what little they could to cope with the gigantic task of ministering to those whose lives might still be saved.

But Henri Dunant did more. The vivid and terrible scenes he had witnessed so impressed themselves upon his mind that a year or two later he published his experiences in a small volume entitled "Un Souvenir de Solferino" (A Remembrance of Solferino), in which he advocated the formation of voluntary organizations to aid the army authorities in carrying out the national obligation of caring for the sick and wounded in future campaigns.

The result was the organization of the great world-wide Red Cross Society.

In this day and generation, with the events of the Great World War still fresh in mind, it is unnecessary to attempt any review of this international neutral, humanitarian organization. Sufficient it is to say that probably no other organization in the world's history has a finer record of achievement, or so completely commands the confidence and support of all peoples. The Red Cross flag and insignia are known and respected everywhere as a sign of absolute neutrality among warring nations, and the highest standard of self-sacrificing service to all suffering humanity.

Originated for service to the sick and wounded of armies in time of war, its amazingly efficient organization and outstanding service during the Great War, so impressed the statesmen of the world confronted with all the difficulties of after-the-war reconstruction of a well-nigh bankrupt civilization, that the Peace Conference at Versailles unanimously called upon the Red Cross throughout the world to remain organized and active, and undertake a comprehensive peace-time work among the civilian populations.

To the Red Cross, therefore, the creation of Henri Dunant, was accorded the distinction of being the only organization, apart from Governments, recognized in the Covenant of the League of Nations, with the solemn obligation imposed on all nations joining the League to encourage and promote the organization of voluntary national Red Cross Societies, having for their object "the promotion of health, the prevention of disease, and the mitigation of suffering throughout the world."

Today throughout the world, the Red Cross with its tens of millions of members, including all races, languages and creeds, is engaged in its mission of mercy. When Nature in a violent mood brings disaster upon a small community, or a famine, or a whole nation, the Red Cross is the first on the spot. Should an epidemic of disease break out, the Red Cross nurses and voluntary workers, inspired by the heroism and humanitarian ideas of Dunant and Florence Nightingale, are the first to take up the work of alleviating suffering. In the Red Cross educational campaign in the promotion of health and the prevention of disease. And should war again inflict ravages, the Red Cross will be found better organized and stronger than ever to assume the burden thus thrown upon it.

In the galaxy of the world's great humanitarians, Pasteur, Jenner, Lister, Florence Nightingale, William Booth, Cuthbert, and others, the name of Henri Dunant shines brightly, while the sympathy which prompted his action on the bloody field of Solferino, and the inspiration leading to his conception of a great neutral volunteer organization in the cause of suffering humanity, continues to call forth the most splendid self-denial and service under the banner of the Red Cross.

Stocking Alberta Fishing Waters

A total of 1,321,075 potential game fish were distributed in Alberta fishing waters in 1937. These included eggs, fry and fingerlings of Lake Leven, Outboard and Rainbow trout. In addition, many of the whitefish eggs were placed in commercial fishing waters in order to maintain the supply of fish for this growing industry in the province.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The only way to correct it is with an alkali, which neutralizes many times the volume in acid.

The right way is Phillips' Milk of Magnesia. Just a teaspoon. Each bottle contains full directions. It is pleasant, efficient, and

Tined By Hockey Clock

One of the electric clocks invented or developed in 20 hours by W. F. Martin, of Port Arthur, for use in scoring time in hockey matches will be installed in the House of Commons in London. The clock will be in effect, calling for the name accuracy in measuring time while members are speaking (with interruptions cut) in hockey games.

There is no poison in the standard with physicians in the 60 years since its invention. It is the quick method. Really come almost instantly. It is the approved method of the world. It will never be used when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any drugstore.

Textile Plant For Edmonton

Mill At Edmonton Will Convert Western Wool Into Fabrics

The establishment of a plant in Edmonton by the Western Canada Woolen Mills, Ltd., is contemplated during the coming summer, according to an announcement made recently. This project has been under an exhaustive series of technical experiments. The mill production has been scheduled to include a range of fabrics including blankets, light and heavy tweeds, overcoatings, velours, flannels and other types of cloth for which western wool is suited.

RICH, RED BLOOD A REAL NERVE TONIC

The Source Of All Nervousness Is Weak, Watery Blood

Many people, both men and women, find themselves run down through overwork, anxiety, and stress. They feel themselves tired, low-spirited and depressed. Their nerves seem to be worn out and they suffer from headaches and other nerve pains. All this comes from weak blood.

Doctors of the nerves with poisons—nervousness is a terrible ailment. The only real nerve tonic is a good supply of rich red blood. Therefore to be healthy, strong and confident, health Dr. Williams' Pink Pills must be taken. These pills enrich the blood, which tones the nerves, improves the appetite, gives new strength and vitality and makes habitually dependent people bright and cheerful.

Dr. Williams' Pink Pills are sold in Washington, D.C., and in all the large cities. Write to Dr. Williams' Medicine Co., Brockville, Ont.

Faces Carved On Building

Likenesses Of Men Prominent In Chemical World Appear On New Structure

Faces of living men are carved in stone on the new million-pound building. The Imperial Chemical Industries' new building at Westminster, England.

One of the faces that is the head of the emperor, Sir Alfred Mond, is the most prominent. The other carvings are said to be excellent likenesses of many men prominent in the chemical world.

The sculpture around the building also includes figures of peacocks, which are said to be there as a symbol of incorruptibility, following the ancient tradition that the flesh of the peacock is incorruptible.

Nation-Wide Fable.—There is scarcely a corner of this great Dominion where the merits of Dr. Williams' Pink Pills have not been tried and proved. It is one of the world's most efficient remedies for sore throat, larynx, and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

Film Industry In Calgary

Production of the first of a series of British films for use under Great Britain's quota law will be started in Calgary this month. May 1. Local capitalists, including P. Barnes and A. E. Cross, are backing the project. Neal Hart will be the director of the first film, which will be entitled "In His Flair."

There is no poison in the standard with physicians in the 60 years since its invention. It is the quick method. Really come almost instantly. It is the approved method of the world. It will never be used when you know.

Buying Registered Seed

Saskatchewan Farmers Have Purchased Much More This Year

The Saskatchewan Registered Seed Association advises that farmers throughout the province have purchased more registered seed this year than in any year in the past and that they are becoming more interested in good seed. There has been a heavy movement of tractors from United States points to points in Saskatchewan this spring and the sale of motor trucks has greatly increased. Evidently farmers are becoming more and more interested in mechanical power.

During the war, Germany raised 15,000,000 men.

Insist on Mimir's Liniment—accept no other.

FOR THE SKIN!

Recipes For This Week

(By Betty Barclay)

QUEEN GEORGIA'S CAKE

- 1 cup shortening.
 - 1 cup sugar.
 - 3 eggs.
 - 1 cup sour milk.
 - 1 teaspoon soda.
 - 1 cup raisin juice.
 - 1 cup nutmeg raisins.
 - 1 teaspoon salt.
 - 1 teaspoon cloves.
 - 1 teaspoon cinnamon.
 - 2 cups flour.
 - 4 teaspoons baking powder.
- Pump raisins, drain and chop, using a coarse cutter. Cream together shortening and sugar. Add 1 beaten egg yolk and 1 white (leave remaining whites for frosting), raisins, sour milk, and raisin juice. Combine with flour sifted with baking powder, soda, salt, and spices. Mix thoroughly. Pour into 3 greased layer cake pans and bake 15 minutes in a moderate oven (350 degrees F.). Put together with boiled frosting.

JUNE WEDDING SALAD

Over individual salad plates with crisp leaves of head lettuce. Place on these, strips of French or canned pineapple, one-inch square of orange pulp, cut thick, and a few smaller sections of sweetened grapefruit pulp. Top with a mound of flavored whipped cream and a hard-boiled cherry or strawberry. Just before serving add a little lemon sauce—juice of one lemon mixed with two tablespoons granulated or powdered sugar. An ideal salad for wedding feast, or for a company dinner.

Record Building Activity

Building and construction contracts awarded in Canada during the month of April, 1938, totalled \$36,345,800 in value, the largest total for any month ever recorded except for May, 1926, when \$37,130,700 worth of new work was contracted for. During April 1938, \$114,062,200 was the total of contemplated work to be done in Canada. This total is the largest ever recorded for any month without exception.

The accumulative contracts awarded in Canada during the first four months of the year is surprisingly large compared with previous years. It now stands at \$135,047,100.

Calgary's Population

Calgary's municipal report on the city's population places the total at 12,500 this spring. The figures given by the census of 1926 were 65,296. Two hundred houses were erected here last year, and 300 will be built this year. There is an increase of 30 per cent. in the quantity of household effects being brought in by new residents. Blocks and apartment houses are all full and hotels are operating at capacity.

Useful In Camp—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Electric Oil very useful in camp.

When the feet and legs are wet and it is well to rub them freely with the Oil and the result will be the prevention of pain in the muscles, and should a cut, or contusion, or sprain be sustained, the Oil will be better as a dressing or lotion.

Will Construct Power Plant

Construction of the first unit of a big power plant in the new coal field is announced by the Montreal Engineering Company—a \$750,000 project which will represent the first actual development of power in Saskatchewan by a central generating station for distribution over a wide territory.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mimir's "Graves' Worm Exterminator."

National wealth of Canada is announced as \$277.2 per head of population. Get in the line early and make sure of your share.

Mimir's Liniment For falling hair.

"Can you give me an example of wasted energy?"

"Yes, I'm telling a hair-fall story to a bald-headed man."

Heat naturally flows from a hot body to a colder one even in the electric refrigerator.

Wheat Pool Building Fastest Grain Elevator

Elevator Now Under Construction Will Have a Capacity of 6,000,000 Bushels

Work has begun on the construction of a 6,000,000 bushel capacity grain elevator at Port Arthur, Saskatchewan Wheat Pool, which, it is said, will be the most modern and the fastest operating terminal elevator in North America. It will be ready for operation about October 15, 1938. When completed it will be served by the Canadian National and Canadian Pacific Railways, and will be able to receive as many as 500 cars of grain per day during the rush season. It will have a capacity of 300 cars per day of ten hours, and will be able to ship grain at the rate of 150,000 bushels per hour.

The total length of the new elevator known as Terminal No. 7 will be 1,244 feet and the width 226 feet. The elevator structure will provide space for 225 loaded cars to be spotted at one time, ready for dumping by the five automatic car choppers, each of which will completely unload a car of grain in ten minutes on the average. To take care of this immense volume of grain 28 elevator legs will be required to take the grain to the top of the elevator, from whence it is dumped into the scale garages.

The completion of this terminal elevator will give the Saskatchewan Wheat Pool a total capacity of 22,000,000 bushels at the head of the Great Lakes which, together with a 2,000,000-bushel terminal elevator at Buffalo and the space previously reserved for the 1926-27 crop, will give the Pool country elevator system in Saskatchewan, will give a total grain storage capacity of more than 10,000,000 bushels for the 1928-29 crop year.

A Timely Suggestion

The farm hand took his girl for a buggy ride. Nine miles out in the country the horse dropped dead. Louise said she knew she'd drop dead. It was a terrible predicament. "Suppose I give you a nic, sweet kiss. That will put life in you." "Are you sure that a kiss will put life in me?" "Positive, darling." "Then, suppose you kiss the horse."

FIREPROOF Farm Construction

CYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations—for remodeling—for partitioning off extra rooms—it is the most economical and satisfactory wallboard on the market.

Gyproc protects from cold, heat, fire, sound and vermin—yet costs less than materials which do none of these things. Quick, easy to install. It can neither crack, warp, bulge or shrink. By filling the joints with Gyproc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gyproc comes in broad, light, ceiling-high sheets of gypsum rock. Takes easy decoration—and is especially suitable for Alabaster. Fast, saved time. The insulating qualities of Gyproc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

Appointment Is Popular

New Inspector Of Taxation In Saskatchewan Has Wide Exposure

Hon. George Scott is to be congratulated upon his appointment as new Inspector Of Taxation in Saskatchewan. This is an exacting position, but Mr. Scott has many qualifications which would seem to assure that he will measure up to its demands. The new appointment has had wide experience in educational life, in business life, in agricultural life, and in public life. All this will be helpful to him in his new post.

Hon. Mr. Scott will be missed in the Legislative Assembly, where a member for Arm River he rendered conscientious and able service not only in behalf of his constituency but also in behalf of the Province as a whole. Whether as Speaker of the House, or as a private member, he consistently enjoyed the respect and regard of members of all political groups.—Regina Leader.

The first advertisement printed in a newspaper was a "travel ad" in the Gazette de France, July 4, 1621, advertising the waters of Forges.

The promonitors on each side of the Strait of Gibraltar are known as the Pillars of Hercules.

Many Daring Aviators Preparing To Make Hop From Old World To New

London.—As the warm winds from the south melt the icebergs off the banks of Newfoundland, and the ships of the Labrador, a small army of aviators in Europe are preparing to make the famous air hop from the old world to the new.

If all the plans now announced bear fruit this spring and summer, the upper regions between London, Paris, Berlin, and New York will be so clogged with aeroplanes, flying boats and dirigibles, and almost any kind of what-not with a propeller, that the seagulls will hardly stand a chance.

Undeterred by the heavy toll of death taken last year and already this year by the attempt to fly from the east to the west, at least a score of aeroplanes are now being made, finished, or tuned up for the long jump. Looming up in the background are a quartette of giant-fleeted, airships.

Almost every nation of Europe seems to have been bitten by the trans-Atlantic flying bug. Not only the larger nations like Britain, France, Germany and Italy, but the smaller nations like Sweden and Holland as well as are entering on the great aerial sweepstakes.

Nor are some of the aviators content with a single flight. A few, like Captain E. H. McIntosh, who attempted a flight last summer, expect to fly right back, McIntosh, with a flying boat, says he will make a double and triple crossing of both the North and South Atlantic.

The 'plane range from the modest two-seaters like that of J. S. Charton, of England, and his wife, Lady Jane Charton, to the 135-passenger aeroplane planned by Professor H. Rüchler, of Germany. H. Rüchler, an English pilot, is building a 'plane capable of carrying 20 passengers. He has adopted the idea of advertising for passengers, saying he will fly July 1, from London to New York.

Stimulated by the success of the Drensen, German aviators are redoubting their efforts. Three companies, the Junkers, the Heinkel, and Rohrbach firms are rushing their entries to completion.

Wins In World Race

Japan Beats Competitor Who Was Held Up By Storm

Tokio.—Tokio-Araki, taking the Eastern route, won the Globe circumnavigating race with his fellow countryman, Ryukichi Matsui, by his trip, in 33 days, 16 hours and 20 minutes. The Western bound competitor, who is now on a liner, crossed the Pacific Ocean, missed his chance of winning the novel race when the steamer carrying him from England to New York was delayed by fog and storm.

A prize of \$1,500 will be awarded Araki, while Matsui gets \$500.

Arrange Tour For Students To Visit

London.—The overseas settlement department, in co-operation with the office of the various Dominions here, has arranged with the overseas governments for a party of University and public school students to make a tour of the Dominions. The date for the proposed tour has not yet been settled, but it is announced the party will visit South Africa, South Rhodesia, Australia, New Zealand, and Canada.

Heavy Casualties Suffered By Chinese As Tsinan Is Captured

Shanghai.—Japanese soldiers had cleared the last Nationalist stronghold from Tsinan, capital of Shantung province, and were in complete control of the city for the capture of which the Southerners had expended the entire force of their drive.

Reports of casualties layed in the expulsion of the Southerners from the city are indefinite, but loss of life is believed to be heavy for the Chinese and Chinese with the probability that many Tsinan civilians will be numbered among the dead.

Three field batteries which the Japanese had placed in the foreign settlement, one near the United States consulate, started to shell the city with shrapnel early in the day. Most of the population of 400,000 were

May Consult League

Possibility Of China and Japan Submitting Dispute To Geneva

Geneva.—A protest from China to the League of Nations over Japanese military action in Shantung is a possibility, Chang Loh, Chinese member of the League Council, said to the Associated Press correspondent. He adds he was awaiting instruction from his government at Peking.

Cheng Loh, who is now in Paris, but is coming to Geneva for the meeting of the council in June, said over the telephone that both Northerners and Southerners have the same view concerning the attitude of the Japanese in Shantung. He thought it conceivable that both factions might unite in deciding to submit the dispute to the League of Nations.

Japan's attitude on the question of referring to the League of Nations the dispute is unknown here. The Chinese-Japanese conflict is regarded in Geneva as cutting straight across the Kellogg outwary of war proposal.

Advantages In Canada

Traveller Makes Comparison Of Conditions In British Isles And New

Toronto.—"I visited every individual in Canada could see, by comparison, the opportunities and enjoyments that we have as compared with the old world," stated E. J. Cronin, editor of the Vancouver Sun, in an interview here regarding his four months' tour of the U.S. and Canada.

The wide gulf between the classes and the masses in Europe cannot be realized and I would not want to see the same condition existing in this country. There is little effort being made to raise the standard of living and by the adoption of modern methods to reduce the stark toll of the European agricultural workers.

"The classes are not thinking in terms of the masses," he declared, especially in England."

Says Alberta Bill

Is Given Support

Hon. C. D. Haning Has Every Hope That It Will Pass

Edmonton.—Hon. Charles Dunning, Federal Minister of Railways, telegraphed Premier Brownlie in reply to the latter's request for co-operation in getting the Northern Railway extension through the house that he has every hope of the bill passing. "The Government has done everything possible, he says, to fill gaps and it extra time has been given private bills after the House has unanimously agreed that Government business should take precedence. Mr. Dunning adds that talking-out tactics on private bills have become very prevalent during the present session.

Extend Relations To Alberta

Toronto.—The Ontario cabinet passed an order-in-council extending to Alberta the reciprocal provisions of the Succession Duties act, which at the last session of the Legislature was amended so as to provide for relations with other provinces in regard to dealing with the schedule of estates.

Plan Meets Opposition

British House Discusses Cold Storage For Imported Meat

London.—Speaking for the government in the House of Lords, Lord Strathmore, minister of agriculture, promised most carefully to consider a suggestion that all refrigerated meat imported into Great Britain from countries where the foot and mouth disease is prevalent should be placed in cold storage at the port of arrival.

Lord Kylesand, in opposing the suggestion, pointed out that 2,948,000 tons of meat were consumed in Britain in 1927, of which \$25,000 tons were imported—chiefly beef of a quality almost equal to the best home-killed beef. In order to secure imported meat in a satisfactory condition, however, it should be available in Britain within 21 days after being shipped.

If chilled meat had to go into cold storage for three weeks on arrival, he said, its value would be considerably reduced as it would have to be frozen. The result would be that the importation of chilled meat would cease and nearly half the people of Great Britain would have to consume frozen meat of an inferior quality and pay a higher price for it than they did at present.

British Bankers Worried

Over Flood Of American Capital Which Is Entering Canada

London, Ont.—Grave fears are entertained by British bankers concerning the flood of American money entering Canada, according to Major Hume Cronyn, London financier, who has just returned from a trip to England and the Riviera.

"It is impossible for us to secure money in England for anything like the rates at which we can secure it here," said Major Cronyn. "This is due largely to the competition of U.S. in Canadian securities. The result is that British capital is naturally being driven out of the country. This is the greatest danger to the British Empire that the new alignment of money power in Canada will have a bearing on the future relations of the Empire. I heard this referred to in England as a menace."

Looking For New President

University Of Alberta Will Seek Strong Man To Fill Vacant Position

Edmonton.—Hon. Ferren Baker, minister of education, said he would shortly for points east, on a tour of investigation that will have as its objective the location of likely applicants to the vacant presidency of the University of Alberta.

He will go right across the Dominion, to the Maritime provinces, and may also cross the line into the Eastern and middle states. Baker has not yet been decided yet that the new university president is to be a Canadian, but other things being equal, the preference will naturally be given to a Canadian-born or at least Canadian experienced.

Severe Sentence For Fulekulent

Bucharest.—Seventeen members of a Rumanian infantry regiment have been sentenced to be shot, following conviction on charge of embezzlement. Two officers died recently in prison before they could be tried. The severity of the sentence and the number of soldiers involved constituted a record in Rumanian military annals, it is said.

British Boys Study Agriculture

The above shows a splendid group of British Public and Secondary school students who have just arrived at the Macdonald Agricultural College, near Kelowna, B.C., for the first of a two years' course at the College. During the summer months they will work on the farms where places have been selected for them. On completion of their studies they will engage in various branches of Canadian agricultural

PROMINENT FINANCIER

Alfred Loewenstein, financier, now in Canada, who, representing one of the leading financial houses of the country, is reported to be seeking to obtain control of the British Traction Co., one of the world's largest public utilities.

Passports Required For Short Vacation

Week-End Tickets To Europe Cost Britishers \$10.00 Extra

London.—The British Easter holiday crowd of "trippers" to the Continent was thrown into consternation by being required to pay \$10 extra for their annual spring outing abroad for the first time since the war.

Since 1919 a special facility had been in force under which persons were allowed to buy week-end tickets to certain French and Belgian ports, available from Friday to Tuesday, which allowed the holders to travel without a passport. Henceforth, passports will be required.

Persons who acquired at the French consulate-general in London, provided that the British authorities had never consented to grant a reciprocal order to French and Belgian nationals, and the French Government now intended to make the abuse of this facility by one individual an occasion for withdrawing it altogether.

To Speed Mail Delivery

Canada Steamship Line May Use Airplanes For This Purpose

Montreal.—To further speed up delivery of mail from the British Isles to Canada, it is understood that the Canada Line in Liverpool have been considering a scheme whereby they carry an aeroplane to be released when the Gulf of St. Lawrence is reached, the plane to take important mail either to Hantsburg or to Quebec.

Officials here state they know nothing definite of the scheme yet, but say that it is quite feasible, as it is occasionally being carried out by ships on the New York service. At present, there is complete silence from the Canada Line in Toronto, operated by the postal department.

Italian Naval Program

Rome.—A new Italian naval building programme was announced by Under-Secretary Sirtanni in the senate recently. Sirtanni said the new programme complements preceding ones and provides for the construction of two 10,000-ton cruisers, four destroyers, and four submarines, for which contracts will be let this month.

U.S. Minister To Canada Is Amazed At Progress Shown In The West

Ottawa.—"I fear that I have been overestimating the 'managing' in discussing my tour of Western Canada, but if it changes it must go into 'improving' as the only adequate synonym," remarked Dr. William Phillips, United States minister to Canada, in a talk to newspapermen upon his return from his tour to the Pacific coast. He was accompanied on his trip by Mrs. Phillips.

Phillips recalled that his previous visit to the west was in 1920, and his recollection of conditions then as compared with those that now exist formed the theme of an interesting conversation.

"While I shall have considerable to say of the development of the west in various material ways," said Mr. Phillips, "what I am most impressed by is the fact that the progress of the country is the remarkable advances made in cultural lines. At Regina, for example, we saw and heard several outstanding orchestras and vocal aggregations representative of the conservatory of music in this thriving city. These had attained a very high degree of excellence.

"When you consider what Regina is, a city of twenty-five or thirty years ago one gets an idea of what real progress means."

"And what is true of Regina obtains in very large degree for other prairie cities. All the prairie centres are developing culturally and materially in a way that presages a future that we may only conjecture at present."

Mr. Phillips expressed himself as most gratified at the places visited in the west by former American citizens. Most of the latter were on the land.

"They are all British citizens and very proud of their adopted country," said Mr. Phillips.

"The Panama Canal has had a striking influence on coastwise trade," said the United States consul in discussing Pacific province conditions. "All the Alberta wheat is being shipped roughly in this connection—and one half the Saskatchewan output is going to the coast and being shipped through the Panama Canal to Europe. The trade to the Orient in this way is developing satisfactorily for the future of Vancouver, for example, is assured as one of the great shipping points of the continent."

"The feeling throughout the West is one of intelligent optimism. The depression which we all experienced during and immediately following the war has now been dissipated and the country is advancing in every way."

"White Americans are coming into the west in large numbers. Canadians are not going into the United States in anything like comparable numbers. In fact, Canadian emigration is decreasing, while American immigration is increasing."

Mr. Phillips paid a tribute to the people of the west, saying that the people of the west are more advanced in their civilization than the people of the east. He also mentioned the fact that the people of the west are more advanced in their civilization than the people of the east.

British Government Warmly Welcomes U.S. Movement For Peace

London.—Sir Austen Chamberlain, secretary of the foreign office, speaking in the House of Commons concerning the Kellogg outwary of war proposals, said that the British government not only warmly welcomed the initiative of the U.S. but was hopeful it would be successfully concluded, and would make a real contribution to world peace.

Sir Austen's statement followed remarks by Ramsay MacDonald, the Labor leader, who supported the Kellogg proposals.

"Our attitude towards this note is going to have a very considerable influence in Anglo-American relations," Mr. MacDonald said. "Nobody who has been in America recently or who has followed the American press will deny that these relations are not so good as they ought to be."

Sir Austen said he would proceed in the ordinary diplomatic channels in treating the proposals, although he had at first favored submitting the matter to a conference of international jurists, as the case of the Locarno pact.

This idea was dropped, however, he explained, when "one of the governments concerned"—understood to be the United States—indicated that it did not approve this method.

The British attitude, the foreign

Buys Western Packing Firm

Dominion Securities, Toronto, Acquires Business Of P. Burns and Company

Toronto.—The Dominion Securities Corporation, Limited, has acquired the entire undertaking and assets of P. Burns and Company, Ltd., Calgary. The transaction is reported to involve upward of \$15,000,000. Announcement of the sale was made by A. L. Fullerton, vice-president of the Dominion Securities Corporation, and a similar announcement of the sale was made by H. Burns, head of the company, at Calgary.

In an interview, Mr. Fullerton stated:

"This transaction concerns one of the largest essentially Canadian industries in Western Canada. The trading company involved no change in the management and policies of the company, which have been so successful over a period of more than 25 years. The executive of the company, all of whom have been in the service of the business for terms ranging from 15 to 20 years, will continue actively in the direction of the company's affairs."

Urges Acceptance Of Canadian Currency

Washington Asked To Sanction Its Use In U.S. Circles

Ottawa.—The Journal in an editorial says:

"Due to a letter addressed by A. H. Jarvis, of Ottawa, to the United States government, several steps have been taken by the State Department at Washington, which may result in the future acceptance of Canadian currency at all centres across the line."

Hesitation on this score on the part of Americans in many districts has long been a source of inconvenience and annoyance to Canadian visitors to the U.S. Although we are Uncle Sam's best customer and despite the fact that the American dollar is accepted without question over here, there are many places and business houses and hotels across the border where the Canadian dollar is no more regarded than it were the paper of Soviet Russia."

Landslide In Colombia

Bogota, Colombia.—Ten persons were killed and many injured in a landslide at the Vende-Cabezas mines, according to information from Bio Suco. It is feared many more were buried alive and rescuers are endeavoring to reach the imprisoned men, the information said.

Secretary continued, had already been forwarded to the governments of the dominions in order that all elements of the empire might seek a common position toward the proposal. He said to transmit the reply to Secretary Kellogg soon after the responses had been received.

Sir Austen was heard with profound interest by the whole chamber.

The only mark of disapproval came when he said that war had never been used as an international policy by any British government of the present era. Here the Labor benches burst into protest, but the secretary maintained his position.

Ramsay MacDonald said direct rejection was that the proposal was ridiculous, in view of the complicated nature of the problems and the ambiguity of the British government. He was convinced that the plan was bound to be a forward step in the history of the world.

This idea was dropped, however, he explained, when "one of the governments concerned"—understood to be the United States—indicated that it did not approve this method.

The British attitude, the foreign

New Developments In Method Of Harvesting And Threshing Will Revolutionize Farming

More marked progress in the development of methods of harvesting and threshing grain applicable to the prairies of Western Canada has been made in the past two or three years than in the previous half century since the first stream of settlers crossed the Red River. The new methods of combined reaping and threshing are resulting in great economies in labor and money. When first introduced the combine or reaper-thresher was considered to have limited applicability and that principally to the drier sections of the country. Nevertheless the number of these machines in use has increased very greatly and they are spreading over a much broader area than was thought possible.

A supplementary machine introduced on the prairies for the first time last year, says the Department of the Interior, through its Natural Resources Intelligence Service, is expected to further extend the field of direct harvesting and threshing without the need for the expensive and time-consuming operation of slogging the grain. The new window method is calculated to advance materially the time at which harvesting can be commenced and to reduce the combine alone. In fact it is claimed by those who have tried it that cutting can be commenced as soon as with the binder. The combine of the new machine is that the stubble is cut high and slightly turned over forming a shelf on which the grain is laid out in windows to dry. With the air currents passing underneath grain is rapidly effected in two to four days of good drying weather the grain is ready for threshing and with a pick-up attachment the combine is then used to finish the operation, following the threshed grain in the tank wagon. Later in the harvesting season the grain in other fields may become sufficiently matured for direct combining without first windowing.

The window machine it is claimed has removed all the disadvantages of the combine. If so the new method may be expected to quickly spread across the prairies and revolutionize the harvesting of grain in Western Canada. Nowhere in the world is there land more suitable to large scale methods of harvesting and the resultant economies may be expected to further enhance Canada's position as the premier wheat exporting country of the world.

Vancouver Island Strawberries

An Exceptionally Heavy Crop To Be Gathered This Year

A heavy crop of strawberries is in prospect on Vancouver Island, B.C., this year. A press despatch from Vancouver states, The Gordon Head and Keating crop is expected to pour hundreds of thousands of dollars in to the farmers of Spanish this summer as a reward of persistent adherence to modern culture and well-vent control methods. While the acreage planted to strawberries shows substantial increase, anticipations of a bonanza crop rest chiefly upon the remarkable condition of the plants, which are in better shape than has been known for many years.

Nineteen carloads of beef cattle, 415 head, were shipped recently from Ashcroft, B.C., to Toronto, Ont., the largest shipment of cattle from that part of British Columbia to Eastern Canada.

A "mechanical man" that plays chess and automatically responds to the moves made by its human opponent has been invented by a Spanish mathematician.

Alexander the Great died of a fever in Babylon in the year 323.

"Who is the man you greeted?"

"The second lieutenant and my first wife," Jean Anouart, Paris.

TALENTED CANADIAN SINGER

Isabelle Burnand, the talented young Vancouver singer, who is being acclaimed both in England and in France for her ability. It is to be presented at court by Hon. Mrs. Peter Larkin, wife of the Canadian High Commissioner in London.

Winnipeg Newspaper Union

Extremely Graceful

Lustrous golden brown crepe satin combines with wrong side of fabric in a charming dress, with the outside front plaited with wide line and a sash. Wool crepe, printed and plain crepe, two tones of silk crepe, georgette crepe and lightweight, wadded with silk crepe are also fashionable for design No. 813. Patterns can be had in sizes 16, 18 and 20 years, 20, 22, 24, 26 and 40 inches bust measure. Size 26 requires 3 1/2 yards of 40-inch material with 1 1/2 yards of 22-inch contrasting and 1 1/2 yards of 27-inch lining. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, with 60 of interest to every home dressmaker. Price of the book 10 cents the copy.

How To Order Patterns

The Hubway's Day-Morland Oil Company has made application for exclusive rights to prospect for a very large area in the Alberta oil sands region in Northwestern Alberta. Negotiations are now in progress between representatives of the company and the Federal Government. The company with this year spent \$50,000 in the erection of plants for the extraction of oil from the sands.

People of France are buying fewer automobiles this year, and French factories are turning out a lesser number of cars than usual.

IMPROVES QUALITY OF WOOL

Sheepmen Advised To Keep Out Dark Hairs When Shearing

"We are well satisfied with the Canadian wool we have been handling for the past seven years," B. C. Windeler, of Windeler & Company, operating in London and Bradford, England, and representing the Canadian Co-operative Wool Growers in Britain and Europe, told the Wool Growers at Toronto when visiting there the other day. "There is a big demand for your clip and mills who have tried it out are coming back with repeat orders."

In discussing wool with G. E. O'Brien, General Manager of Canadian Co-operative Wool Growers, Mr. Windeler stated that he had one suggestion to make and one which could easily be carried out by the sheepmen themselves, in shearing the heads and legs. It is customary to remove the dark or grey hair, particularly where the Down breeds are being handled. This amounts to practically nothing in weight, but when it is tied up with the rest of the fleece it gets mixed in so with the wool during processing in the mills that it cannot be removed. These little short hairs will not take the dye and therefore, they make the wool less fit for manufacturing into the more expensive light colored yarns, and, in his opinion, the bulk of the dark fibre complained of in Canadian wool is traceable to this cause.

Sheepmen are strongly advised by the Canadian Co-operative Wool Growers to make sure that the clip of hair do not get in with the fleece. As previously mentioned there is practically no loss in weight when this material is thrown away.

Plan New Settlement

Belgian Farmers Intend To Establish Colony In Alberta

What may be the nucleus of an entire new settlement in Alberta arrived in Winnipeg recently in the person of a group of 20 Belgian farmers, members of the party of 500 new settlers to the west.

These men possessed some capital and practically a life time's training in agriculture, these Belgian farmers plan to work on Canadian farms for several months to gain familiarity with farming methods over here. When they feel they know enough about the conditions in Canada, they plan to send for their families and relatives, and establish a whole colony near Magrath, Alberta. Each member of the group expects to bring along five families to the proposed colony, which, if all goes well, will be established next year.

In addition to this interesting group, the immigrant special brought west 80 Dutch farmers who will settle in northern Alberta, mostly in the Peace River district. Several British families settling under the Empire Settlement scheme and Dutch farmers, members of the party of 500 new settlers to the west.

General Summerville says: "Do not let peace does not insure it? No, and desire for a meal doesn't satisfy hunger; but it does start you toward a restaurant."

BRITAIN'S HIGH COMMISSIONER TO CANADA

Sir William H. Clark, K.C.M.G., C.M.G., who has just been appointed Great Britain's first high commissioner to Canada, commenced work in the public service as a clerk in the board of trade department of the government in 1859.

Boy World Explorer

That bright-eyed goddess Adventure of whom everyone from the youngest to the oldest has dreamed has beckoned to Russell D. Thomas, a Winnipeg boy, and will lead him on an adventurous path around the world. He has been chosen by Lowell Thomas, world-famed explorer and lecturer, to go with him on a secret expedition into practically every corner of the globe.

Thomas, who is 20 years of age, has been employed for the past three years in the offices of the Canadian Pacific Railway at Winnipeg. When Lowell Thomas was lecturing in the city and made a statement to the press that he was looking for a Canadian boy to go with him in December, Russell got busy and landed the job, that will mean a year or so of rare adventure. First class shorthand knowledge, and an aptitude for photography and mechanics were some of the most important requirements for the position. Satisfying Thomas along these lines, an agreement was reached.

The fortunate Winnipeg boy, next month, leave the Press Department of the Company where he has been employed, and join Mr. Thomas at his home in the Berkshire Hills. From this point the start will be made about December on the great adventure that will carry him into many of the little-known corners of the globe.

Proved His Ownership

Chicago Man Showed Police Stolen Chickens Near Film Station

Ypi Devers learned that there were 16 chickens in the South Chicago Police Station, which had been removed from a couple of boys. Since he had been mysteriously deprived of that many, he called around to claim them.

"How do you know they are yours?" asked the sergeant. "That's easy, if they're mine, they'll talk to me," came the reply from Ypi. He few words in Dutch and 16 began started a riotous laughing of yips and cackling in response.

"They're yours, take 'em away," piped the sergeant above the uproar.

The Spartans never wrote a single line that was considered literature.

New Golf Course At The Banff Springs Will Be Unique Among The Golf Courses of the World

Canada will shortly possess one of the finest and most beautiful golf courses in the world. Assisted by an army of skilled workmen, Stanley Thompson, of Toronto, the internationally known golf architect, is making rapid progress with the construction of the new championship golf course which is being built for the Canadian Pacific Railway Company at Banff, Alberta, and present indications are that the course will take its place at the top of the list of golf links on this continent whether inland or seaside.

Situated on the roof of the world and surrounded by the most magnificent

A view of a completed portion of the links set in wonderful surroundings under the guardianship of the mighty snow-capped mountains.

cent mountain scenery imaginable, the Banff Springs will be unique among the golf courses of the world. It will be of full championship length, the plan calling for a yardage of 6,610. There will also be two other sets of tees with a respective yardage of 6,210 and 6,910. These tees will be of grass and will be in play the whole time, the bunkering having been so carefully worked out that each set of tees presents practically a different course. The fairways, too, will be doubly wide, there being two distinct routes to each hole.

Noted golfers, who have viewed the construction work have been astounded with the thoroughness and magnificence of the plan.

THE FARM BARN

No Longer Overshadows the House In Importance On the Modern Homestead

Pemion movement, and general increase in education may or may not be responsible, but it is certain today that the farm barn, long the carefully built structure on the American farm, today is of no more importance than the house.

This emergence of the farmhouse for years a neglected feature on many farms, into a carefully designed and cared for building, is emphasized in a discussion of the residential value of the modern American farm, in the Farm and Fireside magazine for May. Farmers, as well as their wives, are in many cases realizing that the farm is capable of being an excellent place to live today, and not merely a place of hardship and work without recreation.

"An item of importance," says the magazine, "is the residential value of farms. This concerns the farm as a place to live, for agriculture is today both a business and a mode of life."

Right along with the value of a farm as a productive tract of ground the prospective farm buyer today considers school, church and social facilities of the neighborhood, neighbors and the general healthfulness for his family, says the magazine.

Motor Sled For Cousters

The trouble of walking back after a good ride down a hill has been obliterated by a motor sled that has just appeared in Germany. It is propelled by a cogwheel driven by a one and one-half horsepower gasoline motor. On the slide the drive-wheel is disconnected and the sled steers. Then the engine is operated for the return trip. The sled has made nearly 20 miles an hour on level surfaces, and the footrests are heated by exhaust gas from the engine.

"An artist was engaging a model. 'Can you sit absolutely still?'" he inquired.

"Oh, yes, rather," she replied, promptly. "I was in the civil service for several years."

The optician takes a day off when the rent collector comes around.

VETERAN RETIRES

W. A. Brown, General Superintendent of the Canadian National Railways, Edmonton, who, after 50 years of continuous railway service in Canada, retired on superannuation on May 1. In point of active service Mr. Brown is the oldest railwayman in Canada since the death of the late Sir J. W. Brown is succeeded by W. R. Devenish, formerly General Superintendent of the Canadian National Railways at North Bay, Ontario.

Higher Than Mount Robson Mount Robson, 12,922 feet, long considered the highest peak in the Canadian Rockies, has been forced to give up its distinction as a Canadian mountain, which is 300 feet higher. It is to be named Mount Waddington, after a British Columbia pioneer. The recent discovery of this new peak demonstrates that Canada no doubt possesses many other wonders yet unknown.

Expatriated Carload Of Honey

For the first time in the history of beekeeping in British Columbia, one bee-keeper in the Okanagan Valley has exported a full carload of honey from his own hives. His 250 colonies gave him an average of 175 pounds of honey per colony.

Cuticura Baths Best for Children

Teach your children to use Cuticura Soap because it is best for their tender skins. Assisted by occasional applications of Cuticura Ointment to first signs of irritation or dandruff, it keeps the skin and scalp clean and healthy. Cuticura Talcum is cooling and soothing.

Sample Talcum Free. M. J. Allen, Canadian Distributor, 1000 St. George Street, Montreal. Cuticura Soaping Stick 25c.

National Research Institute Needed

Also Scientists Employed By Government Should Be Paid Higher Salaries

Higher salaries for scientists employed by the government were urged by Prof. J. C. McLennan, University of Toronto, and endorsed by Hon. Charles Stewart, minister of the interior and mines, at a luncheon of the professional institute of the civil service of Canada at Ottawa, Feb. 10. McLennan also advocated establishing a national bureau of scientific research in Ottawa to foster and extend Canada's natural resources.

In urging that a national research institute be formed, Prof. McLennan said such an institution, long overdue, would bring wealth and happiness to the country. If it was in operation for so short a time as a year, it would return the money invested in it.

In reference to water power, Prof. McLennan said:

"What are we doing with our water power. Are we going to give our water power away to the nation to the south of us or shall we develop it ourselves? It is one of the most noble bequests we can make to future generations of scientists. We have men in the service who are fully alive to the possibilities of this, but they are not giving them the freedom they need. They can do things at a surprisingly low cost. Germany is prepared to flood Canada with a cheap fertilizer. We could produce this for Canada more cheaply than they could, and we could increase the fertility of our land from producing 18 bushels to the acre to a yield of 40."

In concluding, Prof. McLennan said:

"I am sure that many of you will be glad to see the government to give their children a college education. I hope they receive greater encouragement in future, that will be paid to the wealth and happiness of this beloved country."

Hon. Charles Stewart agreed with the previous speaker in his question of salaries. "I should be delighted to see one member of the government to get a thoroughly equipped scientific research bureau established in the capital to head up the activities of the national council for scientific research," he added.

"When we go to get a good man, some commercial institution comes along and takes him away. But I'd like to give the professor one year's salary. Get out on the highway and byways and convert the laymen, for they really are the voters who wear the members of parliament. When you convert them you will have no difficulty in getting what you want."

Canadian Chamber Of Commerce

Constitution Is Given Executive Approval At Montreal Session. The constitution of the Canadian Chamber of Commerce, which was referred by the Vancouver convention to the national executive, was formally approved at a recent session of the executive at Montreal.

It was also agreed to ask the Federal Government to appoint a commission to investigate the fisheries of B.C. with a view to their conservation.

A committee of commercial character was also appointed by the national executive under the chairmanship of George Henderson, vice-president of the Montreal convention.

On the committee with him are George H. Darr, K.C., of Regina, Sask., and President Laflamme, of the Montreal Board of Trade. The committee will study commercial arbitration as to its application in Canada.

The man who was born great may die that way.

Investigating Decay In Building Material

Stone Treated With Preservatives Periodically Examined By Experts

High up on the roof of a government building in Whitehall stand columns of stone, acting as silent detectives.

Their purpose is to show the extent to which decay in building material is caused by atmospheric and other conditions, and to reveal how preservatives can prevent or arrest the change.

Periodically they are examined by experts, and although it may be many years before they prove sufficient data for practical purposes, scientists are concentrating on methods which they hope will enable them to discover more fully what causes decay and how it can be neutralized.

One of the columns is composed of Caenian stone, the material which is to be used for the repair of the House of Commons.

It was the rapid decay of stone-work of the House of Commons which focused attention upon a problem which was becoming national. After the country it was found that many important buildings were suffering from similar trouble.

Fourteen pairs, composed of stone and concrete, were erected on the Government building. Seven have weathered them, and one specimen of each kind is treated with a preservative.

Western Plants Thrive In Eastern Canada

Repeat Orders Given For B.C. Seeds and Bulbs

British Columbia is now supplying seeds and bulbs for the markets of Eastern Canada, and the results of recent tests has been extremely satisfactory, according to word received from Victoria.

The superintendent of the Exhibition Park, Toronto, who grew some British Columbia plants last year, made a recommendation to the commissioner which resulted in the placing of an order for 3,000 "Darwins" to be grown next spring in trial plots.

Also sent to Toronto in large quantities are seeds of British Columbia propagated roses, grown for cutting, and it is stated that they give a higher yield per acre than the roses imported from Ireland and Holland and convert the laymen, for they really are the voters who wear the members of parliament. When you convert them you will have no difficulty in getting what you want."

Will Invest In Canadian Lands

American Investors Taking A Keen Interest In Development Of Western Canada

According to H. H. Newville, of Hastings, Nebraska, investors in that State are looking to Western Canada as a profitable field for investment.

One trust company in Nebraska, he said, had \$3,000,000 on deposit, some of which would undoubtedly find its way into Canada for the opening up of farm lands.

Mr. Newville predicted a big movement of farmers to Western Canada for the next two years. "Interest is higher than at any time since 1908-10," he said, "and many farmers in quest of land have expressed their intention of going to see Canada for themselves."

It Will Relieve A Cold.—Colds are the most common ailment of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eucalypti will relieve the bronchial passages of inflammation speedily and thoroughly.

It will strengthen them against subsequent attack. And as it cures the cold, it will keep the throat from becoming inflamed. It kills the irritation in the throat. Try it and prove it.

Goats Protect Oil Tanks

Some 1,200 goats are solving the problem of keeping the grass around on the 16-acre tank farms of the Marland Cattle Ranch near Ponca City, Kansas. The goats are doing wonderful work as mowing machines and keeping the grass well clipped as a protection against fire for the 1,100,000 barrels of crude oil and gasoline stored in the 16 tanks on the big farm.

Memorial Fund Growing

Over \$200,000 Already Raised To Re-build Shakespeare Theatre

Lovers of Shakespeare all over the world will be delighted to hear that John D. Rockefeller has made a donation of \$25,000 to the American Fund for the Rebuilding of the Shakespeare Memorial Theatre, and has offered a similar sum to the Canadian fund. The amount now actually raised or definitely promised is over \$200,000, half of which has been obtained through the efforts of the British committee, and half through the American.

This Wonder Liquid Dissolves Corns Quickly

Make them shrink up, makes them drop off, makes your feet sore well in a day or two. Relief is instantaneous. Faint on a few drops of Eucalypti's Corn Extract tonight—see how well your feet feel in the morning. It's a wonder liquid—a marvel-work. Nothing so good for corns as Eucalypti's Corn Extract. Get your money's worth from your drug store—today. Satisfaction guaranteed.

Famous Child At Exhibition

Many historical objects and curiosities were seen at an exhibition in New York. Some of the specimens came from the famous Holographic Museum at London, and the exhibition included a clock made more than 375 years ago, the smallest wristwatch in existence, the most complicated watch ever made, and a crystal mirror clock.

GAINED IN HEALTH AND IN WEIGHT

Now Gives All The Credit To Dr. Williams' Pink Pills

When young girl became pale, complains of exhaustion of the blood, has dizzy spells, headaches, stomach troubles, and is unable to do anything but rest, she is in need of Dr. Williams' Pink Pills. These pills are the only ones that will restore the blood to its normal state, and give the body the strength and health it needs.

Dr. Williams' Pink Pills. Thousands of weak and ailing girls have found new life in these pills. They are the only medicine that will restore the blood to its normal state, and give the body the strength and health it needs.

Glass May Replace Stone

New York Architect Predicts Its Use For Skyscrapers

Glass skyscrapers for America is the prediction of William Orr, London, New York architect and vice-president of the New York Building Congress. Mr. Orr proposes that glass shall take the place of stone in the construction of buildings, and that glass skyscrapers shall be built. The use of glass, he says, is the next logical step. There is joy, life, and health giving properties in glass structures, and structures that are steel framed but glass sheathed. There is a new aesthetic opportunity offered in building with this material.

There is reported to be one wealthy man who is now considering placing on his land on Broadway the first glass skyscraper in the world. He plans to utilize its amazing possibilities for advertising at night. In place of the mere showing of a short sketch of color.

The architect called attention to a new quartz glass which absorbs heat and violet rays to pass through. He says that since many Americans are perhaps half blind in automobiles and on trucks, for the second time this reason a family arrived in Montreal after a transcontinental trip in a one-hour trip.

Regarded Trip As Adventure

Family Traveled From D.C. To Montreal In Truck

Fifty years ago Canadians trekked across the continent in ox-drawn wagons. Today they cross in automobiles and on trucks. For the second time this reason a family arrived in Montreal after a transcontinental trip in a one-hour trip.

They left last spring to settle in Canada. W. F. Thompson, 41-year-old farmer, his wife and five children, whose ages range from seven to 15 years, left their homes in Duncan, B.C., in a one-hour truck and arrived in Montreal in 23 days, where they embarked on the White Star liner "Doric" for Belfast.

The task of transporting his family involved a big outfit. So Mr. Thompson decided to motor down. He collected the family in a truck and a car, and after a long trip, they arrived in Montreal in 23 days, where they embarked on the White Star liner "Doric" for Belfast.

Was One Of World's Heroes

Man Who Endured Seven Years In Arctic

The death of Hector Pichiorini, known as "the world's loneliest man," reveals a story of self-sacrifice and courage, worthy of a place beside those of the world's greatest heroes.

A moving story of his lonely life in the Arctic was told in the silent Arctic tales of Buffalo Island.

Hector Pichiorini was an English university graduate, a real student, specializing in geology and astronomy. During the war he was an officer on a British mine-sweeper which was torpedoed, he afterwards represented an English trading company in its remote Arctic post for seven years.

The impetuous heroism of his role held up the vessel coming to him with food and provisions, and after waiting vainly for over a year, he accompanied to it, he fought, cold and starvation.

Buffalo Island can well be called the loneliest spot in the world. It lies between Greenland and Canada, and is in the Arctic zone. The temperature is sometimes 50 or more below zero, and the wind seldom or never ceases. It is a dreary spot. The island is about 116 miles across and about 60 miles from north to south.

Winter lasts nine months and includes three months of total darkness, and a few days of twilight, brilliant in the northern light, and falling to absolute blackness in the south. Sometimes even the light is obliterated by great piles which bring with them blinding hail.

In winter months the island is surrounded by a gigantic ice belt many feet deep and varying from 20 to 100 miles in width, making communication with the outer world absolutely impossible.

Recipes For This Week

(By Betty Barclay)

PUMPKIN PIE
1 cup steamed grated pumpkin.
1 teaspoon salt.
1 teaspoon sugar.
1 teaspoon flour.
1 teaspoon cinnamon.
1 egg.
1 cup cream.
1 cup sugar.

Mix ingredients in the order given; pour into pan lined with unbleached pie cloth. Bake in a hot oven (450 degrees F.) for about ten minutes, then reduce the temperature to moderate (350 degrees F.), and bake for about thirty-five additional minutes, or until the filling has set.

PINCAPLE DAVARIAN CREAM

Divide a package of Ipan-dorian cream in one-half pint boiling water. Cook slightly, then add one cup of sugar. Stir until thick. Add one cup of sugar. Stir until thick. Add one cup of sugar. Stir until thick.

Expert Opinion On Dirty Eggs

Question Is One Of Very Great Importance To Producers

The question of dirty eggs is one which should be given more attention by producers if they are to receive the best prices for their product. This is the opinion of Mr. C. P. Rhodes, of P. Burns & Company, Edmonton. Mr. Rhodes, who has had wide experience with egg marketing in the West, states that at this season of the year the eggs which grade seconds and bring low returns to producers are comprised chiefly of the following three dirty eggs: The elimination of these dirty eggs, which is quite possible by proper care and management of the flock, would mean a much greater revenue.

As an instance of the very great effect which dirty eggs are having on egg grading at this time of the season, Mr. Rhodes presented a comparative statement of the grading of the eggs received by his firm in the last week of February with the week end of April 21st. In the eggs received in receipts showed 22 per cent. Extra, 61 per cent. Firsts, and 10 per cent. Seconds, while in the latter week there were only 5 per cent. Extra, 56 per cent. Firsts, and 39 per cent. Seconds.

The increase in the percentage of Seconds and the decrease in the percentage of the better grades," stated Mr. Rhodes, "is due almost entirely to dirty eggs. These two weeks' grading reports show a difference of 24 per cent. in the percentage of Seconds and this affects the value of eggs very materially.

"It is unfortunate that this percentage of dirty eggs is heaviest during the season of heaviest production, and at a time when otherwise the eggs show a very good quality. Later in the season there are but a few dirty eggs, and we get a lot of extra and shrunken eggs, but at this season of the year a large percentage of these Seconds are dirty eggs, and for the most part they are made up mostly of small eggs.

"The reason created egg also," stated Mr. Rhodes, "is a very serious proposition as it is a well known fact that these eggs will not keep when placed in storage. Washed eggs deteriorate very rapidly and must be used within a very short time or they are worthless."

Tractors In Great Demand

Machinery Firms Find It Hard To Fill Orders

A canvass of machinery firms in Saskatchewan shows that tractors are in great demand this year, the majority of firms stating that they are unable to meet the demand. Five firms reported a total of 1,062 tractors in the three months as compared with 403 for the same period last year. One other firm, while not giving exact figures, reports sales down to those of last year and another firm reports sales nearly twice as large.

Develop Crop Products Industry

Western Canada, Crop Products Workers' Association in conference at the University of Saskatchewan (the only western university with a ceramics department), at a two-day convention expressed a determination to develop the crop products industry in the three prairie provinces to the fullest extent possible during the coming building season, the outlook of which is considered to be bright.

Open National Parks To Motorists

The building of first class motor highways and the provision of camps and other facilities have served to make the Canadian national parks much more accessible to our own people, and it is a noticeable fact that Canadians are alive to the opportunities which are open to them; tourists records show that a higher percentage of Canadians is visiting these great reserves each year.

"SPEEDING" A FACTOR IN MOTOR ACCIDENTS

Causes 31 Per Cent. Of Crashes According To Investigation By Expert

"Does speeding cause most accidents?" was a question that just now is causing a considerable discussion among people interested in safety on the streets and highways and in means of lessening the number of accidents. That at least is the opinion of motor vehicle investigators who are contending that speeding is not playing such an important part in increasing the number of motor accidents. It is declared by E. L. Fordney, who has made a special study of the subject, that speed is a contributing factor in accidents caused by motor vehicles. He says that reports received from scores of communities throughout the United States show that out of 45,070 motor accidents involved in accidents last year, 4,870 motor vehicle operators were exceeding the speed limit when the crash took place. This number of accidents approximately eleven per cent. of the total number of accidents. "Under other circumstances," said Fordney, "the number of accidents reported would have been much less than this." It was pointed out, also, that in many of the speeding accidents, the driver may have been over the limit of speed, but the excess speed was not the cause of the accident.

In addition to the accidents charged directly to illegal speed, it is claimed that many other accidents would not have occurred had not the driver been going too fast for the conditions. In the case of the right-of-way, cutting corners and other common infractions would not have occurred had the driver been going too fast for the conditions. In the case of the right-of-way, cutting corners and other common infractions would not have occurred had the driver been going too fast for the conditions.

Beginning To Learn

Arthur Brisbane Has Evidently Changed His Opinion Of Canada

Arthur Brisbane, famous newspaper editor, is always complimentary in his reference to Canada, or anything British. Apparently as he grows older he is learning, for the following appears under his name in the Halifax publications:

"Business in Canada is booming. The record is indicated in many directions. That is good news for this country. Prosperous neighbors are the best. Canadians know how to do some things that, like the serpent on the rock, are too much for us.

"In Canada, government is done and run on railroads successfully. They do not admit as we do, that our public men lack intelligence and honesty needed for public office."

"In Canada they consider the users of typographic power first, even the small farmers, and the power companies come last.

"Here our power companies come first, and the consuming public nowhere. The consumer to the big company is what the young Frenchman was to Napoleon, simply useful material."

Turks Are Dropping Arabic

New Alphabet Is Another Step In Westernizing Turkey

Angora, Turkey. The Turkish people are to join the rest of the world in learning an alphabet beginning with A and ending with Z instead of the "Alif to Zay" of the Arabic. This is the latest enactment of the Turkish Parliament, which under the leadership of Ghazi Mustafa Kemal Pasha, has been Westernizing Turkey.

A new dictionary will be prepared so that the new alphabet may be taught in the schools. Newspapers will be printed partly in Arabic and partly in Latin characters, and the latter will be used for all official documents. Fifty years will be allowed this nation of 14,000,000 souls to accustom itself to the new letters before the use of them becomes obligatory.

The chief argument used in favor of the change is that the difficulty of the Arabic is largely responsible for the illiteracy of the Turkish people. The new alphabet has 32 characters, but since different forms are used at the beginning, the middle and the end of a word, there is an actual total of 96.

Prosperous Canada

"Honors for the year testify to the continued healthy economic condition of the country, and are indicative of the continued and improved opportunities for investment of capital and settlement. No country offers a more attractive field for lands and brain than the Dominion."—Sir Henry Thornton in annual review of operations of Canadian National Railways for 1927.

"I understand none of your ha's understood saying 'Yes' to them." "What's the cause?" "Motor car."

W. R. DEVENISH, General Superintendent of the Canadian National Railways, North Bay, Ont., who has been appointed General Superintendent at Edmonton, Alberta.

New Word Coined

"Avigation" Defined As Meaning To Direct Or Manage Aircraft

One of the newest words in the United States flexible vocabulary, is "avigation." It was given its first official recognition in the New York State legislature when Senator J. Griswold Webb, of Dutchess, introduced a bill designed to place the state in full co-operation with the federal government in the development and regulation of aviation.

In Senator Webb's bill, the word "avigation" is defined as meaning: "To steer, direct or manage an aircraft in or through the air." The word has taken the place of "navigation" among aviators, and was coined last June, after the successful flight of Lieutenant Maitland and Hagenberger from California to Hawaii.

Building Big Elevator

The 6,000,000 bushel elevator being erected at head of Lake Superior for the Saskatchewan Wheat Pool will be completed by the middle of October. There are two annexes to the tower; each will hold 2,000,000 bushels of grain and the storage capacity of the works will be 10,000,000 bushels. The cost of the structure will be about \$8,000,000.

It is usually too late to mend when a man finds himself broke.

NATIVE MATERIALS USED TO ADVANTAGE

When it was decided to build Jasper National Park, the Canadian National Railways summer bungalows hotel in Jasper National Park, the native logs and boulders were chosen wherever possible. The result has been that the guests at this magnificent summer hotel, which will be visited by the Canadian Weekly Newspaper editors and their wives, after their Edmonton convention, find comfortable log bungalows set aside for them, and that though these are of log construction they contain every comfort and convenience of the modern metropolitan hotel.

While there are bedrooms in the main Lodge, a huge building constructed of native logs and boulders, the guests who have been permitted to be housed during their stay in the charming bungalows which have been built along the shores of Lake Louise (The Beautiful Green Lake). The bungalows are arranged in rows, as shown in the accompanying photograph, and each contains a number of bedrooms, a bathroom, a kitchen, and a living room. The bungalows are arranged in rows, as shown in the accompanying photograph, and each contains a number of bedrooms, a bathroom, a kitchen, and a living room.

Sheep Prospects Good

Production On the Increase As a Result Of Prosperity Of the Industry

The outlook for sheep raising for the present year is regarded as encouraging by the Live Stock Commission, according to the Meat Trade Review of 1927, issued by the Live Stock Branch of the Department of Agriculture at Ottawa. Production is known to be on the increase as a result of the prosperity of the industry during the last few years. The promotion work being done for the sheep industry by the Live Stock Branch, as well as the various provincial live stock organizations has been very effective during the past few years and sheep fairs and sales are now a more or less permanent institution in certain parts of the country. The initial investment in breeding stock fortunately does not call for a very heavy outlay in cash and the excellent assistance and advice being provided through the Sheep Clubs and in other ways is aiding in stimulating an interest in the raising of market sheep. This is true particularly in the older parts of the country but it is also true to some extent over the prairies.

Experiment With Pigs

An Average Price Of \$8.83 Received For 84 Pigs

The superintendent of the Industrial Farm at Portage la Prairie, Manitoba, reports an interesting experiment with littered pigs. Last September there was a number of litters on the farm and between February 22 and April 25, 84 pigs were marketed in Winnipeg and brought from \$8.85 to \$10.25 per hundredweight. The total weight of the pigs was 71,720 pounds and the total amount received for the 84 was \$7,529.85, or an average price per pig of \$8.83. The pigs were fitted for market with feed produced on the farm.

Balsam Fir In Nearly Every Province

The balsam fir is one of Canada's most widely distributed trees. It ranges along the Atlantic coast from Nova Scotia to Labrador, westward and northward through New Brunswick, Quebec, and Ontario to Indian Bay, the Prairie Provinces to Great Slave Lake, and westward into northern British Columbia and Yukon Territory.

B.C. FOREST TRACTS LARGEST IN WORLD

And Natural Conditions For Reproduction Most Favorable

Says Chief Forester

The per capita area of timber tracts in British Columbia is far in excess of that of Europe and natural conditions for reproduction are most favorable.

This was shown by Mr. P. Z. Cavershill, chief forester of British Columbia, when he addressed the Canadian Forestry Association, B.C. branch.

The speaker dealt chiefly with the methods of forest perpetuation as employed in British Columbia and European countries.

Mr. Cavershill defined the conditions of forestry and timber operations as being a combination of economics, botany, sentimentality and transportation—"and then some."

A tabulation shown by the speaker on the screen revealed that the per capita area of B.C. forest tracts exceeded that of Finland, the largest producer in Europe, by about tenfold.

A recent visit to the various timber producing European countries, Mr. Cavershill observed the sparse growth in many of the most important supply areas.

While the area of forests in British Columbia was far in excess of any other forest in Europe, his point of view was that the "generation" of a new generation of trees was being noted here, added.

In a recent survey by his department it was revealed that 50,000 acres of Douglas fir was fast approaching maturity. This was only a part of the timber wealth of the province which had been declared.

Conditions for growth in British Columbia were more favorable than those prevailing in Europe, he pointed out. This was evidenced in a comparison of lodgepole pine stands in Finland and British Columbia, both of which had been planted fourteen years ago with Montana seeds.

The British Columbia stand had reached twenty feet in height, while the Finnish stand stood at the 12-foot stage of the Finland trees.

This variety of tree was destined to become an important part of the industry in the province, the speaker believed, as it is utilized chiefly for the manufacture of railway ties, on which the province produces three, and a half billion annually, at a value of between 12 and 15 cents per tie.

Deemed As "Qualified Person"

When Taxes Are To Be Paid

As the courts now interpret the British North America Act, a woman is not a "qualified person" to sit in the Canadian Senate.

But a woman is a "person" she is even a "qualified person" when it comes to paying federal income taxes, which is the only tax levied on Canadian citizens, and which is levied on the basis of the fact by refusing to pay. The courts would soon tell her that she is a person, and liable.

The old Income Tax Act defined a person as a man, which was particularly bright idea. It added, however, that the term included groups of persons as well. The Act said that "person means any individual or partnership, firm, company, or other body of persons, whether or not it has in somebody's mind that a man was a person and a woman an individual. But at any rate, women were liable to the tax and are still liable today, although the Act only taxes "persons." There is no longer an attempt to define that word, except to point out that it includes certain groups, such as bodies corporate.

So women (if any) who have been worrying about the latest decision of the Supreme Court can take heart of grace. They are persons when there is something to be paid, even if they are not qualified persons when senate seats are being allotted.

They are persons in the House called House, even if they are ineligible to sit in the House called Upper. In the former, indeed, they are not only "a person," but "the" person, as group and individual, they are ineligible to sit in the House called Upper. In the former, indeed, they are not only "a person," but "the" person, as group and individual, they are ineligible to sit in the House called Upper.

Sun's Little Mistake

A Southern gentleman, who endeavored to get two negroes to work in his extensive gardens, missed one of the darkest one morning.

"Where's Sam, George?" he asked the other negro.

"In the hospital, sah?"

"In the hospital? Why, what in the world happened?"

"Well, sah, it was just his eye. Sam he been a-stellin' me ev'ry mornin' for ten years he gwine look dat white man's money for his naggin'."

"Well, yes, sah, he done wrong, sah."

Rayon Industry Likely To Treble

Production Is Still Far Behind the Steadily Increasing Domestic

In a recent analysis of the artificial or rayon silk industry, the Department of the Interior, through its National Resources Intelligence Service, states that small though the production may be, the industry is growing rapidly and output will possibly be tripled in the near future. It is pointed out that Canada holds a pre-eminent position in the world as a producer of the raw product—rayon pulp, and that in fact over half the rayon requirements of this material is produced in Canada.

Two processes are in use in Canada for the production of rayon, the viscose process and the cellulose acetate process. The bulk of the world's rayon supply has so far been produced by the viscose method in which the raw material is bleached sulphite wood pulp, in the supply of which Canada predominates. The first artificial silk plant established in Canada uses the viscose process; at present a large addition is being made to this plant which will double its output. The second plant which is just about to get into production of artificial silk uses the cellulose acetate process, in which the principal raw material is cotton linters. It is notable however that large quantities of acetate acid manufactured in Canada will be used in this industry and that it will be a large user of Canadian hydroelectric energy. There is also hope that in time methods will be worked out to apply the cellulose acetate process to the treatment of wood pulp, thus utilizing Canadian raw materials entirely.

That there is an excellent outlook for the rayon industry in Canada is evident from the fact that production is still far from catching up with the steadily increasing domestic requirements. Recent statistics for the calendar year 1927 show imports of rayon and its products amounting to \$7,472,000, while exports of rayon in 1926, there have been no exports so far of Canadian rayon yarn, and when the industry has been expanded sufficiently to the fact of domestic requirements, there is little doubt that Canada will be heard from in textile trade in this most useful textile.

Value Of Clean Seed Grain

10,000 Bushels Of Seed Grain Handled By Grading Plant

At Edmonton

Approximately 40,000 bushels of registered Marquis wheat and Victory and Banner oats were cleaned, graded, registered and marketed by the Provincial Cleaning and Grading Plant at Edmonton, Alberta, during the past winter. In addition a considerable quantity of high grade registered and No. 1 seed has been sold on commission for farmers whose grain was not accepted at the plant, and a further 25,000 bushels of registered seed could have been disposed of if it had been available. The fact that fully 85 per cent. of the grain passing through the plant was sold to Alberta farmers indicates a recognition of the value of seed grain which is clean, of good quality and true to variety.

Americans Look Over Oil Fields

H. W. Dodge and E. A. McManus, of New York; Samuel Smith, of Great Falls, Montana; and R. L. Kerr, of Spokane, Wash., directors of the Texas Corporation, were investigating the Southern Alberta oil field last month with a view of extending the refinery facilities of the corporation to that field. The Texas Corporation and the California Petroleum Corporation were merged recently.

Many Inquiries For Farm Lands

Canadian sales of Government-owned Railway farm lands for the first three months of the year have been double those of the corresponding period of 1927. Inquiry for farm lands generally have increased in the same proportion.

OVER 75 MILLION JARS USED YEARLY

WORLD HAPPENINGS BRIEFLY TOLD

During 1927 the salmon catch in British Columbia totalled 1,300,000 cases and fell short of the 1926 production by 740,000 cases.

The Prince of Wales has decided to use a fast army two sector plane to fulfill his engagements around the country.

Fifteen Royal Air Force pilots have been killed in flying accidents since the first of the year, it was announced in the British House of Commons.

Chain broadcasting from the Atlantic to the Pacific will be undertaken by the Canadian National Railways radio stations next fall.

William Burns, 86, who came from Toronto in 1852 to organize British Columbia's schools at the request of Premier John Robson, is making a lingering illness.

Col. Charles A. Lindbergh has flown about 200,000 miles in his career as pilot, according to a report filed with the aeronautics branch of the commerce department.

With a view to promoting night flying in the Dominion the civil aviation branch of the department of national defence is planning a lighted airway along the shores of the St. Lawrence for 35 miles.

Captain Malcolm McFay, veteran master of the steamer Keweenaw, lost the double honor of having captured two parts this year, the Sault and the head of the lake, securing two salt lake for his feat.

Workmen digging at Old Fort Erie, Ont., uncovered the skeletons of British soldiers and an Indian who fell during the American siege of the fort in the year of 1812. Fragments of a shell and the positions of the skeleton indicated that the four had been buried by the missiles that killed them.

Co-Operative Wool Marketing

During Ten Years Of Operation More Than Thirty-Six Million Pounds Were Handled

More than 36,000,000 pounds of wool have been handled by the Canadian Co-operative Wool Growers, Ltd., during the ten years that it has been operating. This association is a sales agency serving the provincial and local associations in the provinces of Canada, from Nova Scotia to British Columbia. Wool of the 1927 clip was assembled by 16 local associations and delivered to the larger organizations for marketing. The 1927 receipts consisted of 3,626,315 pounds of wool and 11,930 pounds of pelts. Of this amount 41 per cent. came from Alberta, and 18 per cent. from Ontario, Manitoba, and Saskatchewan together furnished 18 per cent. of the total quantity.

In addition to marketing wool the association has handled shawls, tweed, stockings, supplies, and manufactured wools. Total sales of these side lines for 1927 amounted to \$77,473.

Lawyer: Don't you think you are straining a point in your explanation?

Witness (a cook): May I me, I think you often have to strain things to make them clear.

"My Scotch boy friend sent me his picture."

"How does it look?"

"I don't know, I haven't had it developed yet."

Science Discovering Secrets Of Leprosy

Caused By Bacteria Says Professor Of Tropical Medicine

Leprosy, the dread disease, which sends its victims into colonies of "The Living Dead," has begun to give its secrets.

New evidence relative to the ancient scourge, tending to show it is caused by a definite bacterium and is not contagious has been gathered by one of the famous "microbe hunters" of the University of California. He is Dr. E. L. Walker, professor of tropical medicine in the University Medical School, Berkeley, Cal., who recently returned from a 14 month trip in Honolulu. While there he carried on extensive investigations of the cause of leprosy at the Molokai Receiving Hospital.

Although Dr. Walker made it clear his findings are only tentative, he predicted that if they are sustained by further research they will result in changes of great scientific, economic and governmental importance. Here are the two conclusions reached as the result of his studies in Hawaii.

1. Leprosy is caused by a bacterium related to the fungus amygdaceae, a plant-like growth of microscopic size, which thrives on living organisms except that of man, but which is found in the soil virtually everywhere in Hawaii.

2. These bacteria enter the body in cuts or wounds about the feet, and are not transmitted by the leper, despite the cry of "unclean," which has driven him as an outcast from society.

John

That turned the talk to the modern counterpart of the tramp printer, the real journeyman, who drifted from town to town and who was the backbone of the old-fashioned country newspaper. The machine, which was usually a machinist as well as an operator and often an all-round printer as well as a taken his place, they told me. And "he" is often as not a "lone" one are the machine and the corn-cob pipe, the shild stick and the old-fashioned printing press made the old-time country newspaper shop picturesque and glamorous. It is a lively little town today, in comparison. It was a Nebraska Indian operation on the Cook County, there who was crowned Queen of the Johnson County Fair last fall. No tramp printer ever achieved anything like that.

"Gentlemen," I said when we had got that far, "you have been breasting my heart by degrees ever since we were together. You have been making my long illusions into a cold reality. You have thrown me into the hell, as it were. You have turned what was once a glorious and responsible adventure into a sordid, commercial, efficient, prosaic, money-making business. I can survive those revelations, as I have survived the discovery that the machine and the type looks alike are my life. But I can no longer make my life out of this. I am a tramp printer. I do not, I beg of you, tell me that the patient inside is dead."

My appeal moved them, though not precisely to tears. They hastened to assure me that the patient inside still lives. The patient inside and its young brother, the boiler plate of letters, memory, are still standards in country newspaper shops. They are still the backbone of the country newspaper. I can tell you that the patient inside is dead.

A delightful printed Pussy Willow silk dress, with fashionable tiered skirt, that can be worn for street, yet is dainty enough for any smart occasion. The long-sleeved bodice, with square neckline and applied bands forming deep V at front, of plain hand-making silk crepe, shirtings. The figure, Design No. 867 is attractive and versatile, made of wool crepe, two surfaces or crepe satin or organdy. Pattern is obtainable in sizes 10, 12 and 20 years, 26, 28, 40, 42 and 44 inches bust measure. Size 36 requires 4 1/2 yards of 40-inch material with 3/4 yards of 1 1/2-inch ribbed silk. Country printer, illustrating the newest and most popular styles, is of interest to every home dressmaker. Price of the book 10 cents.

Small Town Papers

FRANK PARKER STOCKBRIDGE

Reprinted by special permission from *Bay City Press*, Bay City, Mich., "Country," May 1927.

(Continued)

Awards like those, and the others which the association gives out, are doing a great deal to stimulate country editors to produce better papers. The Brookings Register, in South Dakota, for example, holds the current average prize. That puts the Eastern publisher on his mettle, but it is the Eastern paper, the Graphic, of Newton, Massachusetts, which won first prize in the association's advertising contest, while the News, of Montevideo, Minnesota, took first place as an example of good newspaper production.

These awards are powerful influences for the betterment of the country press, the others agree, but two or three spoke simultaneously of the schools of journalism as perhaps the most potent factor of all in the progress of the small-town weeklies.

"You don't think that this lack of boys and girls who are being graduated every year from the country journalism were getting city jobs, did you?" asked Bert Mills, a J. expressed to me. "I don't know, but I may there are—somehow between the two. I don't know, but I leave—which have full-fledged journeymen, and I don't know, but I leave. Willard Dwyer, dean of the Wisconsin University school, said that other day that there were more boys than there are graduates to fill them, and I believe he's right. I don't know, but I believe schools are concentrating on the study of the small-town weekly rather than on the study of the city newspaper. I don't know, but I believe State, for example, pays almost no attention to the study of the small-town weekly, when a boy or girl is graduated there he is at the mercy of the market, a country weekly. It won't be long now, perhaps in our own time, when the country editor will be a university graduate will be as rare a thing as the old-time tramp printer today."

That turned the talk to the modern counterpart of the tramp printer, the real journeyman, who drifted from town to town and who was the backbone of the old-fashioned country newspaper. The machine, which was usually a machinist as well as an operator and often an all-round printer as well as a taken his place, they told me. And "he" is often as not a "lone" one are the machine and the corn-cob pipe, the shild stick and the old-fashioned printing press made the old-time country newspaper shop picturesque and glamorous. CHAPTER XXIV

It was at Port Simpson, in November, on his way out, that Jack Gordon heard of the war. They had floated down the Nehalem River on a motor skin large to the Mack, and down the Liard to the Lake Kende on a spruce canoe, arriving at Port Simpson one raw November day when a cold wind from the North gave warning of the freeze-up. They had brought with them a few furs, which George, the half-breed guide, had got with his trap-lines, and from the sale of these they hoped to be able to try supplies for the house journey.

The summer had been full of adventure. They had seen the leaves come on the trees, the flowers bloom, and in the evening, the sun and the now lowering clouds of November driven by the cold winds; but with their bags full of goods, and their little sleds they had carried in chains of glass and glass plates, they were elated and confident.

Jack, with all the eagerness of the amateur, had been full of enthusiasm going in, and in the evening, of gold from the sand of the river he had enjoyed endless delight. To see the glint of yellow gold in the black sands at the bottom of a pan fired his imagination. Keith had complimented him on his success in panning.

"She's getting better all the time," Keith had said. "You are getting closer to the deposits." He had a map of the country showing the exact spot where the claims would be staked. "You'll have some nuggets to bring home to that new wife of yours that will make her eyes pop out of her head."

It was in September they reached the place, and Keith announced the object of their search, and George, who staked their claims and gathered some rich pieces of quartz to bring back to them. Keith was confident, and even George, the half-breed, grew glib with the prospect of riches. He was going to have three men, a colored driver in a gray uniform.

Keith had the plan for mining all arranged. He showed them where the claims would be placed, drew a diagram to show the angle at which they would be set and how the riffles would cut it in the bottom, and then, bringing the water in a pipeline from

the place, Jack and George got to work. "The Peace," and soon had the grime of travel washed away, and went to the dining-room for supper. Men in uniform sat at a table, eating noisily and drinking. The room was full of excited talk.

There was a meeting in the hall that night, advertised by a large red poster in the corner. It said that Mr. Gordon and Pts. George Grove would address the meeting. Pts. had been wounded at Men and been invalided to Canada. There were signs in the dining-room, and on the way they had to pass the signs flying from the house and stores, flying bravely in the cold wind.

To the hall they went at eight o'clock, and were met at the door by women selling red roses for the Red Cross. A hand inside was playing "It's a Long, Long Way to Tipperary." To Jack it seemed as though he had come back to a new world, a nervous, nervous, light-hearted world. Fresh from the solitudes of the north, he was not at once grasping the meaning of it all.

Pts. Grove, a pale lad, standing with a crutch, spoke first, and spoke simply and well. His superior officer had called him for the mildness of his address at Spirit River the night

before. "You've got to put more thunder into it," he said, "these people want color and action. Tell them about the children you saw with their hands cut."

"What I didn't see any," protested the lad.

"Well, you heard of them—you might have seen them. Speed up a little—lay it on thicker, or you'll never get recruits."

But again the boy told just what he had seen—the mud—the hardships—the indescribable carnage—the comradeship and heroism of his companions of the trenches. There was no hatred, revenge or bitterness in his heart, only a great bewilderment. He appealed on behalf of his comrades—they were so brave, so cheerful and so fine—so willing to die.

Jack's heart was torn with the pity of it. "What of all was the boy's twitching hands, never still a moment. What horrors that boy must have come through! His lips had quivered as he spoke, like a child's, and he didn't leave these boys alone; send them reinforcements. The more we can send the sooner it will be over."

That was the message of the quivering lips, coming from a heart that was clean and brave. He could talk without apology, could Pts. Grove, he could say any person make a sacrifice and not ask them to do more than he had done.

My dear friend, who arranged the program, had left himself for the last. In the ordinary affairs of life Major Gordon behaved in being first, but understanding what he would have called "mob-psychology," he believed the last speaker had the best chance. He began by telling of his own life, with great spirit, revealing his history, military aspirations, and their home life. He showed that they themselves were actually doing good. He told of his own life, with great spirit, revealing his history, military aspirations, and their home life. He showed that they themselves were actually doing good.

(To Be Continued.)

BABY'S OWN TABLETS
THE HOME DOCTOR

Baby's Own Tablets meet all the need that exists in every home where there are young children. They are a laxative, but do not irritate one particle of the delicate lining of the bowels. They can in any way do the slightest harm to the delicate lining of the bowels. Baby's Own Tablets reduce fever, relieve colic, break up constipation, induce sleep, check diarrhoea, soothe the stomach and allay the irritation that accompanies the commonest of all ailments. They quiet the nerves and promote healthy sleep. They are as good as a doctor in the home. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A six-week-old calf was nibbling at the grass in the yard and was viewed in silence for some minutes by the city girl. "Tell me," she said, turning quickly to her hostess, "does it really pay you to keep such a small cow as that?"

Minard's Liniment for Toothache.

The man who tries to prove too many often proves nothing.

One way to put your time is over the jawbreaker's counter.

The Experience of Mrs. Roy Brown is Well Worth Reading

Petersen, Ont. "I was in a miserable state of health for some time, completely, I don't sleep, had backache, and was completely exhausted. I was long, long way to Tipperary." To Jack it seemed as though he had come back to a new world, a nervous, nervous, light-hearted world. Fresh from the solitudes of the north, he was not at once grasping the meaning of it all.

Pts. Grove, a pale lad, standing with a crutch, spoke first, and spoke simply and well. His superior officer had called him for the mildness of his address at Spirit River the night

Jack's heart was torn with the pity of it. "What of all was the boy's twitching hands, never still a moment. What horrors that boy must have come through! His lips had quivered as he spoke, like a child's, and he didn't leave these boys alone; send them reinforcements. The more we can send the sooner it will be over."

That was the message of the quivering lips, coming from a heart that was clean and brave. He could talk without apology, could Pts. Grove, he could say any person make a sacrifice and not ask them to do more than he had done.

Teeth and Health

CHILDHOOD DISEASES AFFECTING TEETH

It occasionally happens that teeth erupt faulty in shape or with the enamel pitted and stained, and you wonder what has caused it.

Now a very probable source of this trouble is a general disturbance from some constitutional disease associated with high fever, such as measles, scarlet fever, mumps, or chicken pox. Occasionally this disturbance is so great as to totally destroy the tooth germ, but more often it merely affects the tooth structure and the enamel above.

Of these are two general diseases that, in particular affect tooth structure and tooth eruption.

Of these diseases is a disease of faulty nutrition and it is worthy of note that it is a disease of the very poor who are denied proper food, but of the rich, who have an abundance of food but of an improper kind.

The characteristic affections of the teeth from rickets are these: the deciduous teeth erupt late, and in the more extreme cases, there is a general delay in the eruption of the permanent teeth, which are late, while the permanent teeth in turn erupt late, the result, faulty tooth formation, malocclusion. Moreover, the teeth themselves are structurally defective, being bluish, sparse and somewhat "leaky."

The other disease, more or less specifically related to tooth malformation is tuberculosis. A child suffering from tuberculosis of the lungs, both the deciduous and permanent teeth early, but the root of the tooth is badly affected, and the tooth is structurally defective, being bluish, sparse and somewhat "leaky."

It is perhaps easier to understand why the teeth are so affected in children, and hence are read- able to influence of a disturbing nature.

No Cause For Worry

Great Britain Still in a Position To Pay Her Debts

It is regrettable that only the United States presidential election campaign there have to be injected into warranted attacks upon Great Britain. Here is what Senator Reed, in an address before the Daughters of the American Revolution, had to say: "England has been doing 66 years in which to pay her debt to us, and she has not done it. She still has the power to pay it."

Does the fact, the Halifax Herald comments, that the Reds are in the midst of a political campaign give them warrant for such unmitigated nonsense. Perhaps it does. But when they have realized this, may they run across this contemporary utterance by Winston Churchill, British Chancellor of the Exchequer: "England is not done yet. She still has the power to pay a friend or pay a debt."

And Great Britain probably will enjoy that power for many years to come, when the Senator Reed's will have been lost in oblivion and when such things pass for "one hundred per cent. Americanism" will look silly in retrospect.—Regina Daily Post.

Canada To Establish Bureau Of Standards

Action Of Government Will Be Acceptable To Provinces

The Government proposes shortly to set up a Bureau of Standards which will operate under the National Research Council, according to Hon. James Macdonald, Minister of Trade and Commerce. When the Bureau of Standards is established, he said, Canada will not have to accept her standards from Chicago. A Bureau of Standards would be acceptable to all the provinces of Canada as well as to the electric power companies throughout the Dominion, the Minister claimed.

Good Price For Prize Steer

Amie Turner, 11-year-old girl who cleaned up with her steer at the Kempenko, B.C. sale last week, and proceeded to do the same at Calgary afterwards led the animal into the ring at Edmonton, where it fetched 50 cents a pound live weight, the purchaser being the Hudson's Bay Company. The sale netted \$600, in addition to which prizes averaging \$150 were won at each of the three shows.

Neuralgia succumbs to Minard's Liniment.

An Outstanding Invention

Two Ontario Men Have Plans For Quick-Firing Machine Gun

The attention and interest of the world's war departments, especially the highest ordnance officers, are focused on London, Ont., at the present time because in this city plans have recently been completed for a new machine gun that is undoubtedly the most outstanding quick-firing invention yet perfected.

Of these is a disease of faulty nutrition and it is worthy of note that it is a disease of the very poor who are denied proper food, but of the rich, who have an abundance of food but of an improper kind.

Probably the greatest advance made in the new quick-firing long-shoot feature of non-explosive liquid air cooling—a goal sought by the war research laboratories of all nations. The invention also can be readily disposed of for a very large sum, as the liquid air, which has been extremely dangerous to handle in the past, is now rendered perfectly safe. At least a machine gun that will not overheat, and necessarily have to cease action to cool, has been built.

Speed Up Construction

German Contractors Use Furnace On Wheels To Dry Walls

Homes and apartments are so scarce in Berlin, Germany, that architects and contractors think up every conceivable device for hastening the process.

Their latest quick service help consists of a furnace on wheels which is carted to hasten the drying process in buildings under construction. It is placed outside the house or apartment building, and furnaces are laid from it into the room to be dried. The heat is conducted just as though a hot air furnace were in operation in the basement.

In this way, it is estimated, construction is hastened by many days, as the painters and decorators can get busy much earlier.

Next month another 100 head of buffalo will be shipped from the Canadian National Park at Watnwright to the big reserve north of the Peace River. Overstocking of the Watnwright Park renders this necessary.

Asshina Doesn't Wear Off Abuse

Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering within you, and you live in danger of stronger and yet stronger attacks. Dr. Kellogg's Asshina Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

The Arabs were the first to discover the art of refining sugar, with the Egyptians a close second.

Always Keep Cuticura Preparations On Hand

The Soap, because of its absolute purity and emollient properties, is unsurpassed for every-day use. Assisted by Cuticura Ointment it does much to keep the skin and scalp healthy. Cuticura Shaving Stick makes shaving easy for tender-skinned men. Cuticura Talcum is the ideal toilet powder.

Always Keep Cuticura Preparations On Hand

There's no denying that the most careful carpenter doesn't handle his tools with the delicate movements of a dentist.

Consequently he will appreciate a building paper which allows him to throw careful handling to the winds and work rapidly without fear of tearing.

Hercules Permanent Building Paper is tough. Tearing or cracking in use is unheard of. Carpenters prefer it, because it is easy to use.

Hercules—in three grades, x light, x medium, and x heavy, is wind proof and damp proof.

Send now, for samples and prices.

MOST people know this absolute antidote for pain, but are you careful to say Bayer when you buy it? And do you always give a glance to see Bayer on the box—and the word 'Aspirin' printed in red? It isn't the genuine Aspirin without it! A drug store always has Bayer, with the proven directions tucked in every box!

Tablets Aspirin Bayer

Little Helps For This Week

"Cast thy bread upon the waters; for thou shalt find it after many days."—Ecc. 11:1.

Oh, if the selfish knew how much they were losing!

What would they not endeavor, not to do.

As far as in them lay, Him who His wisdom and His power have made them happy.

The most delicate and the most sensible of all pleasures consists in promoting the pleasures of others.

Happiness is not perfected until it is shared.—Jane Porter.

Worms are encouraged by morbid conditions of the stomach and bowels, and as the stomach and bowels will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Demand For Rental Farms

Swift Current reports a record business being done in automobiles, and farm tractors. Money seems fairly plentiful as a large proportion of the orders placed are on a cash basis. Horse sales and sale of farm equipment have improved greatly over last year, according to the dealers. There is also a big demand for rental farms and quite a movement in purchase lands.

Always Keep Cuticura Preparations On Hand

Why Gum-Dipping
Increases Tire Life

A tire in use is being constantly bent backwards and forwards by road action. Such movement generates friction and heat that has a deteriorating effect unless the tire is built to withstand it.

In the carcass of a Gum-Dipped tire there is less friction to generate heat because of the dipping puts a coating of new life rubber around each separating cord that keeps it from rubbing against the cords that lie next to it. It stays cooler and lasts longer.

Your local Firestone Dealer will gladly advise you on your tire problems. See him first.

E. S. Sexton Proprietors A. Harkin

Thursday, June 7, 1928

Dr. McNeill was a visitor to
Calgary over the weekend.

Mrs. N. Bassarab and children,
were visitors to Calgary
over the week end.

Miss Kathleen Sexton re-
turned from Medicine Hat, on
Saturday.

Frank and Art Scott made a
trip to Regina the first of the
week.

The Empress bell team were
visitors to Leader on Friday
last and took the short end of
a one-sided score.

People from the neighboring
districts were well represented
at the presentation of the play
on Wednesday.

The L. O. D. E. will hold a
Sale of Home Cooking at F. G.
Sundercock's store on Saturday
afternoon June 9th.

The McQuinn Sisters are ap-
pearing at the local theatre
next Wednesday.

Wednesday was a day of
happenings and one of the
most pleasant as far as farmers
were concerned was a very
heavy down-pour of rain in the
evening that apparently covered
the whole district, giving all
crops ample moisture for the
time being.

Castle Coombe W.M.S.

The Castle Coombe W. M. S.
will meet at the home of Mrs.
Ferguson on Wednesday after-
noon June 13th at two o'clock.

Mrs. Fowkes of Neville, Pres-
ident of Presbytery is expected
to give an address.

At the close of the pro-
gramme a Basket Picnic will be
held; all interested are welcome.

A large number from town,
attended the Sports at Burnstall,
Monday.

How to Go Broke is New
Scheme to Educate Farmers

A little destructive criticism
helps in a constructive way
"How to Go Broke Farming" is
the title of ten tales issued by
the extension division of the
University of Tennessee, based
on this truth.

This advice is a little different
from that usually given farmers.
Instead of the usual "don't do
this," the university says, "do
such and such if you want to
go broke." Here are the ten
rules:

1. Grow only one crop.
2. Keep no livestock.
3. Regard chickens and a gar-
den as nuisances.
4. Take everything from the
soil and return nothing.
5. Don't stop gullies or grow
over crops—the top soil
wash away, then you will have
"bottom" land.
6. Don't plan your farm
operations. It's hard work
thinking—trust to luck.
7. Regard your woodland as
you would a coal mine, cut
every tree, sell the timber and
wear the cleared land out cul-
ivating it in corn.
8. Hold fast to the idea that
the methods employed by your
grandfather are good enough
for you.
9. Be independent—don't join
with your neighbors in any
form of co-operation.
10. Mortgage your farm for
every dollar it will stand to buy
things you would have the cash
to buy if you followed a good
system of farming.

PROVINCE OF ALBERTA
Department of Municipal Affairs

NOTICE is hereby given that unless
all arrears of taxes imposed in respect of
any parcel of land situated in Improv-
ement District No.

182, 211, 212, 213

in the Province of Alberta, are paid on
or before the First day of July next,
such land will be dealt with under
the provisions of the Tax Recovery Act be-
ing Chapter 122, Revised Statutes of Al-
berta, 1922 with a view to obtaining
Certification of Title in the name of the
Crown in the right of the Province of
Alberta in respect to such parcel.

W. D. Spencer,
DEPUTY MINISTER,
EDMONTON, May 30th, 1928.

General Motors To Build
Big Assembly Plant at Regina

Regina, Sask., June 1st.—The
announcement yesterday that
a million dollars will be spent
by General Motors of Canada
Limited on the erection of a
manufacturing and assembly
plant at Regina is a very prac-
tical form of the optimism
which one of the country's
largest manufacturers has for
the future of the Canadian
West.

Establishment of the Regina
plant is in pursuance of the
General Motors policy of plac-
ing assembly plants, where
values of sales warrants, as
near as possible to the centre
of distribution for the particu-
lar territory. Under this sys-
tem the benefits of increased
employment, payroll distribu-
tion and local purchases are
spread to the territory which
provides the volume of sales.
Increasing General Motors busi-

ness throughout Western Can-
ada has made the establish-
ment of the Regina factory a
logical move. Chevrolet and
Pontiac cars produced here will
be marketed throughout the
Canadian west.

FIVE REASONS

WHY WHEAT PRODUCERS SHOULD SUPPORT

THE WHEAT POOL

1. Because your self-protection as a producer is incomplete
and ineffective if private organizations can still exploit you
by manipulating prices against you.

2. Because co-operation helps to uphold the standard of
living by improving the standard of producing in the
grain produced by your labor.

3. Because co-operation eliminates unnecessary middle-men
and divided loyalties shareholders, who take a heavy toll
of the wealth produced by the farm workers.

4. Because the cooperative principle of "each for all, all
for each" is the workers' ideal which alone can bring
economic and social justice, peace and prosperity, to all
throughout the world.

5. Because the farm workers ought to concentrate their
resources in co-operation instead of supporting capitalistic
organizations hostile to co-operative movements.
